

SpaceVac High-Level Cleaning Systems 2021 Illustrated Pricelist (SEK)

British Engineering. Global Issues.

SpaceVac are the world's leading manufacturer of high-level vacuum cleaning and inspection systems. Our pioneering technology is revolutionising gutter cleaning, high-level interior, exterior cleaning and high-level inspection!

The SpaceVac system was invented 10 years ago and since then, continuous research and development has provided a range of systems that are revolutionising high-level cleaning.

All of our systems are designed, manufactured and hand assembled right here in the UK; utilising cutting edge carbon engineering techniques to offer our clients the very best solution for high-level cleaning, anywhere on the market.

From our fully conductive Atex systems, (the world's first independently certified high-level cleaning system, approved for use in combustible atmospheres) through to our wide selection of tools and accessories; the SpaceVac range – all featuring our market leading "Safety Locking Mechanism" – have been designed and manufactured with safety and quality at heart.

A Revolution in High-Level Cleaning:

The origins of the SpaceVac system lie in gutter cleaning. Recognising an opportunity in the market for a system that allows operators to clean these areas from the total safety of the ground floor, the system was developed and launched almost a decade ago and has since seen constant refinement and improvement, creating the world's leading high-level cleaning system.

The SpaceVac System:

The system itself is made up of four distinct elements.

The first part is a unique universal vacuum to hose cuff that safely connects the SpaceVac system to your vacuum. (In addition - the mechanism allows for direct connection of tools for detail work where required.)

The second part of the system is a range of **interlocking poles** which combine to a maximum height of 20m high. The lightweight carbonfibre poles utilise our unique "safety locking mechanism" to stay together during operation.

Thirdly - our range of cleaning poles are complimented with a full range of safety locked **cleaning**

tools including lightweight durable cleaning heads for removing built-up debris, collecting material from gutters and even a range of brushes and tools for cleaning internal racking, ducting and vents. These tools and heads can also be interconneted to create custom shapes and configurations.

Finally - In addition; all of our systems can be acccessorised with the addition of our new Explorer camera and monitoring system; offering powerful monitoring capabilities with a 9 hour battery life, 1080p live streaming and even a unique remote access facility for users to share streams with other users anywhere in the world direct to their mobile devices.

A Market Leader for a Reason:

Since its introduction, SpaceVac has won rave reviews from end users and facilities management companies alike for its technical abilities and robust long lasting construction.

As our international expansion has continued, the system has continued to find new markets with businesses across a wide range of sectors and geographies winning awards from the likes of ISSA and Green World along the way!

Innovation. Not Imitation.

Since our line of high-level cleaning systems first entered the marketplace, our engineering team have continued to develop, adapt and refine our systems.

Today our range includes 14 different cleaning systems - all suited to different cleaning environments and price points - as well as a full range of specialist systems, accessories, addons and ancilliary products.

The core lines within the SpaceVac range are our Internal, ATEX and External systems - each comprised of a full hose kit, pole kit and range of cleaning tools and brushes. Available at a range of price points - from our entry level LITE system to our market leading ULTRA system - the range all feature our unrivalled build quality and come equipped with our unique safety locking mechanism as standard.

Joining the SpaceVac range in 2020 were three specialist systems all designed with very specific purposes in mind. The first - an ATEX approved Food Safe Cleaning system with FDA cleaning accessories suitable for use in Food and Drink manufacturing facilities - where the highest standards in cleanliness and hygiene are a must.

This exciting new development was joined later in the year by our new **High-Voltage** pole system (Rated

as capable of withstanding up to 50,000 volts) for use in high-voltage trackside environments and a new **Museums and Fine Art** accessory pack designed to provide soft touch, nonabrasive cleaning of old and delicate items.

In addition, our team have also worked hard to create a range of supporting add-ons and accessories to enhance and add further functionality to our products.

In late 2020 we were delighted to unveil the new Explorer Camera system - a game changing new development in camera and monitoring technology offering unrivalled quality and specifications (First utilised on the NASA / Orbital Sciences Space Mission). The new camera system boasts a 9 hour battery life, 12MP photos and 1080p recording as well as a unique remote access function to allow sharing of feed with offsite colleagues.

Putting the Vac in SpaceVac

As we enter 2021 - the lastest addition to the SpaceVac range is our brand new line of Spacevac vacuum cleaners; designed to provide the perfect companion to any SpaceVac high-level cleaning system.

Hand built by a team of vacuum specialists to our exacting

specifications, the newly released trio of vacs are engineered to provide a powerful cleaning performance in any area.

The new SpaceVac line features three systems. The first is the new **Endeavour**; a dual motor system designed for removing high-level dust and other materials from internal areas.

Moving up the range, users looking to clean internally and externally, will look to our new **Hurricane** wet / dry vac - living up to its moniker with three independent motors providing unrivalled suction and airflow for cleaning with our Internal and External cleaning systems.

Finally; operators working in ATEX certified areas such as industrial manufacturing facilities or bakeries, can now also utilise the new **SpaceVac TITAN Vac**. The centrepiece of our Vacuum line, the Titan is a new ATEX certified vacuum unit safe for use in these highly specialised environments in conjunction with our range of conductive, full Carbon cleaning systems.

In addition to their impressive specifications (see over) all of these exciting new vac system are also fitted with new "Tool Holders" for easy storage and access to SpaceVac poles and tools when cleaning - another innovative new design feature.

Innovation not Imitation

As of March 2021 the future looks bright for #TeamSpaceVac. Our focus on developing new and innovative products means a number of exciting new products are already being readied for launch.

Among these new developments are the launch of a new ATEX certified version of our Explorer Camera, and the introduction of our new Steamline High-Level Steam Cleaning System. This exciting new collaboration with Tecnovap UK brings the power of steam cleaning to new heights utilising our brand new system.

In addition, our pole range continues to be the focus of constant improvement, as our engineering team settle into our new state of the art manufacturing facility in Newcastle. This brand new addition to the SpaceVac family brings with it, the ability to develop a number of exciting new products including the introduction of new composites like Graphene and Kevlar to offer even greater levels of innovation and performance to our customers.

Book a demo of any of our highlevel cleaning systems or vacuum today - visit the website at spacevacinternational.com to book!

The SpaceVac Lite cleaning system is a low-cost entry level product for occasional users and users only requiring a few metres of additional reach.

Ideal for use in domestic settings as well as light commercial use such as smaller retail units or office space where the removal of dust is critical to not only cleanliness but also the health of employees working within the space.

Featuring our unique "safety locking mechanism" the SpaceVac Lite system is capable of reaching over 4m in height and can be fully accessorised with a range of additional add-ons tools to give users increased flexibility.

Product Focus: 38mm Internal Lite

No of Poles: 3 Material: Glass Fibre Weave: Unidirectional Working Height: 5m Length of Enclosed Poles: 4.2m Pole Diameter: 38mm Pole Length: 1.25m No of Heads: 1 No of Brushes: 2 Hose Kit Included: No

What's Included: SV38/LITE

Each 38mm SpaceVac Lite system comes with the following items included as standard:

Full Kit List Price: 8 500 SEK

5V38/125-LITE 3 x 38mm x 1.25m LITE Pole 2 700 SEK [900 SEK/st]

SV/LPB 1 x Lite Pole Bag 295 SEK

SV38/32HA 1 x 32mm Hose to Pole Adaptor 880 SEK

SV38/90H 1 x 90 Degree Cleaning Head 1 495 SEK

SV38/8SW 1 x Small Flexi Brush 1 985 SEK

SV38/SRB 1 x Small Round Brush 795 SEK

Don't Forget: All of our SpaceVac cleaning systems can be accessorised with a range of add-on tools and accessories - be sure to check our accessories and add-ons section for more information.

The Pioneer system is a new addition to the SpaceVac range, designed to fill the gap between our budget friendy, entry-level LITE system and the bigger, more powerful systems available elsewhere in the range.

Reaching up to 6m in height from the safety of the ground floor, the Pioneer system has been designed for users looking for a little extra reach and functionality in their SpaceVac system.

Often paired with a backpack vacuum, the unobtrusive working method along with our easy to deploy system means that maintenance can be carried out with minimal distruption to personnel in the area.

Product Focus: 38mm Internal Pioneer

No of Poles: 3.5 Material: Glass Fibre / Carbon Fibre Composite Carbon Weave: Unidirectional Working Height: 6m Length of Enclosed Poles: 5.4m Pole Diameter: 38mm Pole Length: 1.6m No of Heads: 3 No of Brushes: 3 **Hose Kit Included:** Yes

What's Included: SV38/PIONEER

Each 38mm SpaceVac Pioneer system comes with the following items included as standard:

Full Kit List Price: 19 500 SEK

SV38/16-Pioneer 3 X 38mm X 1.6m Pioneer Pole 6 100 SEK [2 100 SEK/st]

SV38/08-Pioneer 1 x 38mm x o.8m Pioneer Half Pole 1 395 SEK

SV38/50HC 1 x 38mm Hose to Vac Cuff 250 SEK

SV/HB 1 x Hose Bag 395 SEK

Our Internal Classic System provides operators with a safe and easy way to clean high-level areas up to nearly 10m high from the safety of the ground floor.

Designed and manufactured in the UK, the 38mm classic pole, is made from a high grade 3K Carbon Fibre blend to keep operating weight to a minimum - when compared with aluminium cleaning pole alternatives - whilst being able to withstand rigorous use.

Additionally, the Classic system includes a full range of interconnecting heads, brushes and tools providing a versatile cleaning solution, that can even interconnect to create custom shapes and configurations for difficult to access areas!

Product Focus: 38mm Internal Classic

No of Poles: 5.5 Material: Glass Fibre / Carbon Fibre Composite Carbon Weave: Unidirectional 3K Working Height: 9.5m Length of Enclosed Poles: 8.8m Pole Diameter: 38mm Pole Length: 1.6m No of Heads: 4 No of Brushes: 5 Hose Kit Included: Yes

What's Included: SV38/CLASSIC

Each 38mm SpaceVac Classic system comes with the following items included as standard:

Full Kit List Price: 37 500 SEK, med Explorer kamera

SV38/16-Classic 5 x 38mm x 1.6m Classic Pole 10 100 SEK [2 100 kr/st]

SV38/50HC 1 x 38mm Hose to 1 x Hose Bag Vac Cuff 250 SEK

SV/HB 395 SEK

Developed for operators looking to reach increased heights turn to the SpaceVac Pro 38mm system for heavy duty performance.

In developing our Pro poles, SpaceVacs engineering team faced a unique challenge - how to increase the reach of the SpaceVac system without compromising operation.

By employing advancements in Carbon engineering technology, the team developed a new carbon fibre blend utilising increased amounts of carbon to produce a cleaning pole that not only reduced the individual pole weight (crucial when adding additional poles to reach increased heights) but also improved the rigidity of the complete system to ensuring stability - even at full height.

Product Focus: 38mm Internal Pro

No of Poles: 7.5 Material: Carbon Fibre Carbon Weave: 4k Woven Carbon Fibre Twill Working Height: 12.5m Length of Enclosed Poles: 12m Pole Diameter: 38mm Pole Length: 1.6m No of Heads: 4 No of Brushes: 5 Hose Kit Included: Yes

What's Included: 5V38/PRO

Each 38mm SpaceVac Pro system comes with the following items included as standard:

Full Kit List Price: 46 600 SEK, med Explorer kamera.

SV38/16-Pro 7 X 38mm X 1.6m Pro Pole 18 550 SEK [2 700 kr/st] 1 995 SEK

Introduced to cater to power users looking to reach heights in excess of 20m, the SpaceVac Ultra pole is our finest high-level cleaning poles yet.

Designed and manufactured in Great Britain, the ULTRA poles have been developed in response to requests for an internal system with increased reach for use in larger interior spaces.

Developed by our team of engineers, the new pole features a market first '12K Carbon Weave' to provide a pole with our highest quality carbon engineering yet.

The new pole offers our best ever build quality in our lightest, most durable and most rigid pole yet allowing for heavy duty cleaning performance at world record breaking heights!

Product Focus: 38mm Ultra System

No of Poles: 9.5 Material: Carbon Fibre Carbon Weave: 4k Woven Carbon Fibre Twill Working Height: 15.5m Length of Enclosed Poles: 15M Pole Diameter: 38mm Pole Length: 1.6m No of Heads: 4 No of Brushes: 5 Hose Kit Included: Yes

What's Included: 5V38/ULTRA

Each 38mm SpaceVac Ultra system comes with the following items included as standard:

Internal Vacuum: SpaceVac Endeavour

The SpaceVac Endeavour is a powerful twin motor vacuum cleaner for excellent suction and easy removal of high-level dust and dirt from internal settings.

- Two single phase brush motors double stage by-pass
- Painted version with trolley "LIGHT VERSION type" in RAL goo5 black, container and filter chamber in RAL 7001 grey
- Motor-head in ABS/metal black coloured
- · Independent switches for each motor
- · Vacuum-meter to check the filter efficiency
- 9m Long Electrical Cable
- Star filter in polyester cat. "L"
- · Manual filter shaker on top of the vacuum
- Quick inlet 870mm
- Dust bin of 251 provided with handle and
- Rear castors 0125mm, front castors 0100mm with brake
- · With special support for SpaceVac tools

Working closely with our specialist manufacturing centre, our engineering team have developed and tested a brand new system packed with new features and cutting edge camera technology.

The resultant system is the most powerful, flexible and efficient camera system available anywhere in the specialist cleaning marketplace.

The brand new **EXPLORER** systems packs a range of innovative new features including our unique remote access function allowing for real time streaming to anyone, anywhere in the world!

Product Focus:

Stills: 12mp
Streaming: 1080p
Battery Life: 9 hours
Waterproof Case: Yes
Waterproof Connections: Yes
Low Light Mode: Yes
Compatible with other
devices: Yes
Remote Access Mode: Yes

What's Included: SVCAM/EXPLORER-KIT

Each SpaceVac Explorer system comes with the following items included as standard:

Full Kit List Price: 9 850 SEK

SVCAM-EXPLORER
Waterproof Explorer
Camera
4 360 SEK

SVCAM-OBSERVER 1 x Phone Monitor4 4 360 SEK

SVCAM-CLAMP Camera Tube Clamp 705 SEK

SV/CB 1 x Camera Bag **371 SEK**

5V/CC 1 x Camera Clip 89 SEK

SV/USB 1 X USB Cable 69 SEK

1 x Data Cable 69 SEK

The SpaceVac SpaceSuit is a brand new cleaning addon designed to make the use of SpaceVac even more comfortable for operators.

The lightweight but durable Plastic support brace, spreads the weight of the system evenly across operators shoulders and backs to make even long, heavy duty cleans much more comfortable and with less strain on the back, neck and shoulders.

The system also includes a pair of prismatic glasses to allow operators to easily monitor progress of cleans without needing to look upwards - helping to avoid operators straining their neck and making SpaceVac even more comfortable to work with.

In addition to being compatible with any of the SpaceVac high-level cleaning systems in our range, the new Spacesuit is also compatible for use with any telescopic inspection inspection or even high-reach, water fed window cleaning pole systems making it an attractive add-on to facilities managers who offer these additional services in their portfolio.

EP090

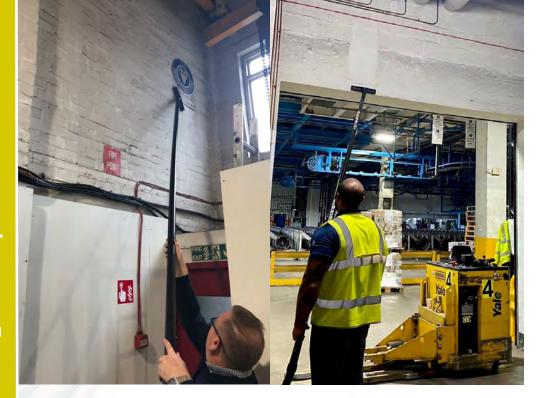

1 x Ergopack 8 500 SEK

EP080

1 x Periskopglasögon 1 295 SEK

Tested and certified to ATEX standards; Our Atex LITE Cleaning System is a perfect introductory system for occasional users and operators cleaning at low levels in Atex areas.

Recognising that not all specialist atmospheres have to be huge spaces, the Atex LITE system has been developed for entry level users and teams with occasional cleaning requirements above head height.

In developing a smaller variant of our 38mm cleaning pole, SpaceVacs engineers have created the perfect beginners SpaceVac pole - offering a lightweight package with dependable robust construction to offer peace of mind to operators.

Product Focus: 38mm Atex Lite

Carbon Weave: 4k Woven Carbon Length of Enclosed Poles: 4.2m Pole Diameter: 38m Pole Length: 1.4m No of Heads: 1 No of Brushes: 2 Hose Kit Included: No

What's Included: SVA38/EX-LITE

Each 38mm SpaceVac Atex Lite system comes with the following items included as standard:

Full Kit List Price: 21 900 SEK

SVA38/125-LITE 3 X 38mm X 1.25m Cleaning Poles 6 500 SEK [2 167 kr/st]

The Atex Pioneer has been specifically launched to fill a gap in the Atex cleaning line.

Tested and certified to Atex standards: the Atex Pioneer offers operators up to 6 metres of reach from the safety of the ground floor, allowing operators allowing for the safe removal of combustible materials such as wood. flour or paper from above head height.

The system was designed to sit in the SpaceVac range between our entry level Atex Lite system and the more advanced heavy duty products elsewhere in the line such as our **Pro** AND **Ultra** lines and is all manufactured in fully conductive 100% carbon.

Product Focus: 38mm Atex Pioneer

Our 38mm Atex cleaning poles were a world first when they first entered the combustible market in 2016.

Developed in response to a number of deadly incidents involving the incorrect cleaning equipment in explosive atmospheres, SpaceVac sought to engineer a system safe for use in these specialised environments.

Manufactured to the highest standards right here in the UK - our Atex poles are made from 100% carbon, with the 38mm Pro poles and are tested and certified to Atex standards:

The system is fully accessorised with a range of Atex and anti-static accessories for flexible cleaning options.

Product Focus: 38mm Atex Pro

No of Poles: 5.5

Designed for power users operating in the most extreme of cleaning environments, our 50mm Atex PRO cleaning poles are the next evolution in cleaning.

Developed in response to customer demand from operators who were cleaning in extreme heavy duty environments, our 50mm cleaning poles offer an increased operating diameter to users to increase airflow when cleaning at height - even when removing heavy duty blockages such as sawdust, wood shavings or metal filings.

Engineered to the highest standards in the UK - our somm poles are manufactured to a high grade 100% carbon formula right here in the U.K. and are all tested and certified to Atex standards.

Product Focus: somm Atex Pro

Our new Atex Ultra cleaning poles are the new standard in high level cleaning worldwide; utilising cutting edge carbon engineering techniques to create our lightest, most durable pole ever.

Designed to provide a cleaning system with the ability to reach heights up to 15m, the new Atex **Ultra** range provides unrivalled build quality and performance - delivering a pole that is both lighter than our pro pole, with increased rigidity and an even stronger carbon weave.

The results of these developments in carbon engineering technology is a pole that can scale heights of over 15m from the safety of the ground floor.

Product Focus: 38mm Atex Ultra

Carbon Weave: 12k Woven Carbon Length of Enclosed Poles: 15m Pole Diameter: 38mm Pole Length: 1.6m No of Brushes: 4 Hose Kit Included: Yes

What's Included: SVA38/EX-ULTRA

Each 38mm SpaceVac Ultra system comes with the following items included as standard:

Full Kit List Price: 149 980 SEK

Atex Vacuum: SpaceVac Titan

The New SpaceVac TITAN is a efficient ATEX certified vauum cleaner safe for use in the removal of zone 22 dust (group II, category 3D)

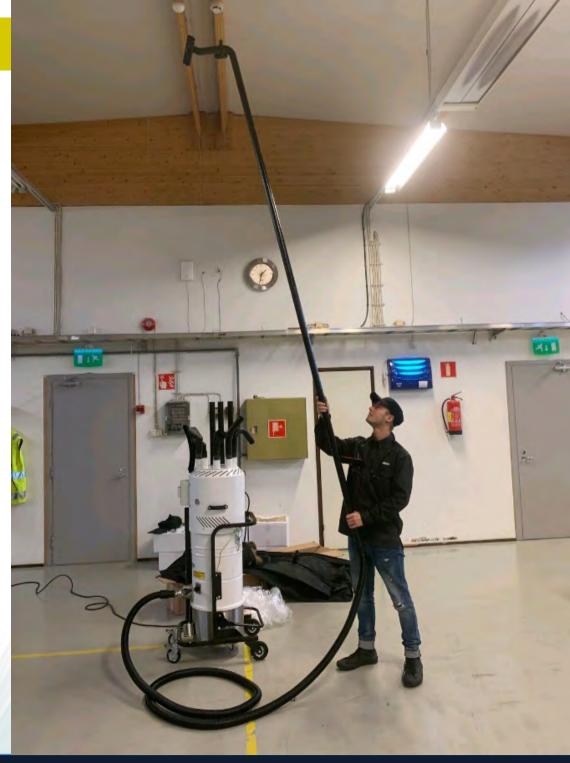

This revolutionary new ATEX Vacuum system offers a fully conductive single motor solution, designed to provide powerful suction for use with our Conductive Atex cleaning systems.

- Single phase motor asynchronous marked ATEX EX II 3D
- Trolley in RAL 9005 black, container in stainless steel and filter chamber in RAL 9003 white
- Vacuum-meter to check the filter efficiency
- Electric cable 10m long with industrial plug 2P+earth 16A IP67 marked ATEX
- Star filter in polyester cat. "L" antistatic
- · Manual filter shaker on side
- Quick inlet 870mm
- Relief valve put in as standard
- Dust bin of 25l provided with handle and castors
- \bullet Rear castors 0:25mm, front castors 0:00mm with brake, antistatic
- · With special support for SpaceVac tools

Don't Delay: Book a Free Demo of these new Vacuum units with your local SpaceVac rep!

Our External Cleaning System is a simple, durable system for the cleaning and maintenance of guttering and downpipes capable of reaching up to a height over 10 metres from the safety of the ground floor.

The cleaning and regular maintenance of these guttering areas, is an often overlooked but crucial part of any building management plan; as blocked guttering can lead to leaks, structural damage to the property, and even health problems for the occupants within.

Given its almost universal application, our External system has rapidly found a home in stadiums, schools, colleges, warehousing facilities and many other sectors worldwide.

The manufacture of Food & Drink is one that that requires the very highest standards in cleanliness.

The risks of cross-contamination and the integrity of the wider food chain mean that cleaners and facilities managers have a requirement to easily remove the by-products of manufacture from within their facilities as well as the pests attracted by these prodcts.

By developing a specialist food and drink safe version of our cleaning system, SpaceVac has created a unique solution for cleaning above head height. With materials like dust and flour often dispersing and settling on high level areas, our food safe pole system easily reaches these otherwise inaccessible areas to remove these materials guickly and safely.

Product Focus: SpaceVac Food Safe

No of Poles: 5.5 Material: 100% Carbon Carbon Weave: Full 4k Carbon Twill

Working Height: 9.5m Length of Enclosed Poles: 8.8m Pole Diameter: 50mm Pole Length: 1.6m No of Heads: 4 No of Brushes: 5 Hose Kit Included: Yes
